ABOUT ME

Hello there! I am Ashley Cheah, a UX/UI designer based in Brea. I have a passion for designing, wireframing, prototyping, interacting with people and serving others any way I can.

On the side, I serve on the cabinet board for Biola Hula Halau, which I absolutely love. I choreograph, lead, dance and teach whenever I can.

TECHNICAL SKILLS

- ●●●○○○ Web Design
- ●●●●○○ Prototyping
- ●●●●●○ Design
- ●●●●●○ HTML/CSS/JS
- ●●●●●● Adobe XD
- ●●●●●● UX/UI

Web Design

User Interface and Design

Software Engineering

Operating Systems

Advanced Database

EDUCATION

Biola University (2016-2020)

Bachelor of Science: Computer Science, Minor in Biblical and Theological Studies - May 2020

INTERNSHIP

Agency 41 (Spring 2020-current)

UX Design Intern - February 2020

RELEVANT PROJECTS

TransportOp (Spring 2020-current)

I along with 2 other individuals are creating a web app, database, and mobile app for a professor's study. The tool's purpose is to help truck drivers to optimize transportation with the lowest cost for gas. My duties include designing, prototyping, and coding the web app.

Campaign Buddy (Spring 2019)

In Software Engineering, four classmates and I created a website tool that help Dungeons and Dragons game masters run their campaign successfully and efficiently. I participated in the processes of wireframe, mock up, prototyping and user testing.

NSP Records Website (Spring 2018)

I helped create the wireframe for the National School Project's records homepage for staff. The staff members are able to access statistics in a clean and clear manner.

SGA Connect (Fall 2017)

In UI Design, 3 classmates and I created a program to help Biola's Student Government reach and connect to their student population more effectively. I participated in the following stages : planning, wireframing, designing, implementing, user testing
